

imPowr Release 1.2.51

1. Review Notes

- when you use the browser print, multiple pages will now be printed
- the filters and buttons are now hidden from the printout

2. Reports

- when you use the browser print, multiple pages will now be printed, and graphics will shrink down to fit (some fine tuning is still needed)
- the filters and buttons are now hidden from the printout

3. Assessments

- When creating a new assessment, you can now enter the actual assessment date and a comment
- The assessment date and entry date are now both visible and filterable on the assessment list
- if no assessment date is provided, it uses the current date
- the trend now uses the assessment date (if one is provided) rather than the date of data entry
(Note: Certain reports may have to be revisited)

4. Surveys

- New 'Copy' survey feature
- Fixed bug on creating certain types of new surveys
- Fixed bug that prevented you from moving a survey to a new category
- Made form categories user configurable from the configuration page

5. Success Stories

- Now tracks created by and created date
- Ability to filter for author and creation date on Success story screen

6. Client Record

- Made gender list user configurable from the configuration page; added "non-binary"

7. My Dashboard

- Made additional pages available for selection as 'favorites' (donation, community events, campaigns volunteers)

8. New "Job Order" feature

- Part of an emerging workforce development module. This section is used to track "orders" that come in from places like Walmart, etc. The job order indicates # of openings and various descriptions and attributes for jobs that may be a good fit to be filled by agency clients.

9. Event Sponsorships

- Sponsors can now be people and families as well as organizations

- The sponsorship score has been merged with the donor score since both are a type of donation
- Fixed bug related to display of 'paid' icon

10. Miscellaneous

- Cleaned up a few spots where general accounts still used the word 'business'
- Cleaned up a few spots where general accounts still used the word 'patient'
- Various cosmetic fixes to account programs, account profiles, organization profiles
